

Fractions are **NUMBERS** part 2. <http://www.green-planet-solar-energy.com>

Remember to break up the numbers into the correct amount of parts, given in the ()s after the set number.
Remember also to make your number lines BIG.

Q1. For each set, draw a new number line from **0 to 5** and place the fraction numbers on that line.

Set 1: (4)

$3 \frac{1}{4}$	$2 \frac{1}{4}$	4	$2 \frac{2}{4}$	$3 \frac{3}{4}$	$1 \frac{1}{4}$
-----------------	-----------------	---	-----------------	-----------------	-----------------

Set 2: (4)

$3 \frac{1}{4}$	$4 \frac{1}{4}$	$2 \frac{2}{4}$	1	$2 \frac{1}{4}$	$0 \frac{3}{4}$
-----------------	-----------------	-----------------	---	-----------------	-----------------

Set 3: (3)

$1 \frac{1}{3}$	5	$0 \frac{2}{3}$	$3 \frac{1}{3}$	$2 \frac{2}{3}$	$4 \frac{1}{3}$
-----------------	---	-----------------	-----------------	-----------------	-----------------

Q2. These sets require a number line between **10 and 15**.

Set 1: (2)

$11 \frac{1}{2}$	12	$13 \frac{1}{2}$	$10 \frac{1}{2}$	11	$14 \frac{1}{2}$
------------------	----	------------------	------------------	----	------------------

Set 2: (5)

$10 \frac{1}{5}$	$13 \frac{1}{5}$	11	$12 \frac{2}{5}$	15	$11 \frac{4}{5}$
------------------	------------------	----	------------------	----	------------------

Set 3: (6)

12	$14 \frac{1}{6}$	$14 \frac{1}{6}$	13	$11 \frac{4}{6}$	$14 \frac{5}{6}$
----	------------------	------------------	----	------------------	------------------

Q3. These sets require a number line between **5 and 10**.

Set 1: (6)

$5 \frac{1}{6}$	$9 \frac{1}{6}$	7	$7 \frac{3}{6}$	$8 \frac{2}{6}$	10
-----------------	-----------------	---	-----------------	-----------------	----

Set 2: (4)

$8 \frac{1}{4}$	9	$5 \frac{3}{4}$	$9 \frac{1}{4}$	7	$7 \frac{2}{4}$
-----------------	---	-----------------	-----------------	---	-----------------

Set 3: (3)

$9 \frac{1}{3}$	$8 \frac{1}{3}$	$7 \frac{2}{3}$	5	10	$9 \frac{2}{3}$
-----------------	-----------------	-----------------	---	----	-----------------

Q4. Let's have a go at some **NEGATIVE NUMBERS**. You will need a number line between **-3 and +3** for each set. Remember that unsigned numbers are *POSITIVE*.

Set 1: (2)

$$-2 \frac{1}{2}$$

$$-3$$

$$2 \frac{1}{2}$$

$$-1$$

$$1 \frac{1}{2}$$

$$-2 \frac{1}{2}$$

Set 2: (4)

$$-2 \frac{1}{4}$$

$$3$$

$$2 \frac{1}{4}$$

$$-1 \frac{3}{4}$$

$$0$$

$$- \frac{1}{4}$$

Set 3: (3)

$$-2$$

$$2 \frac{1}{3}$$

$$- \frac{2}{3}$$

$$\frac{1}{3}$$

$$1 \frac{1}{3}$$

$$-3$$

GOOD WORK.
